Combination Flow

The Formula for a Comfortable Life

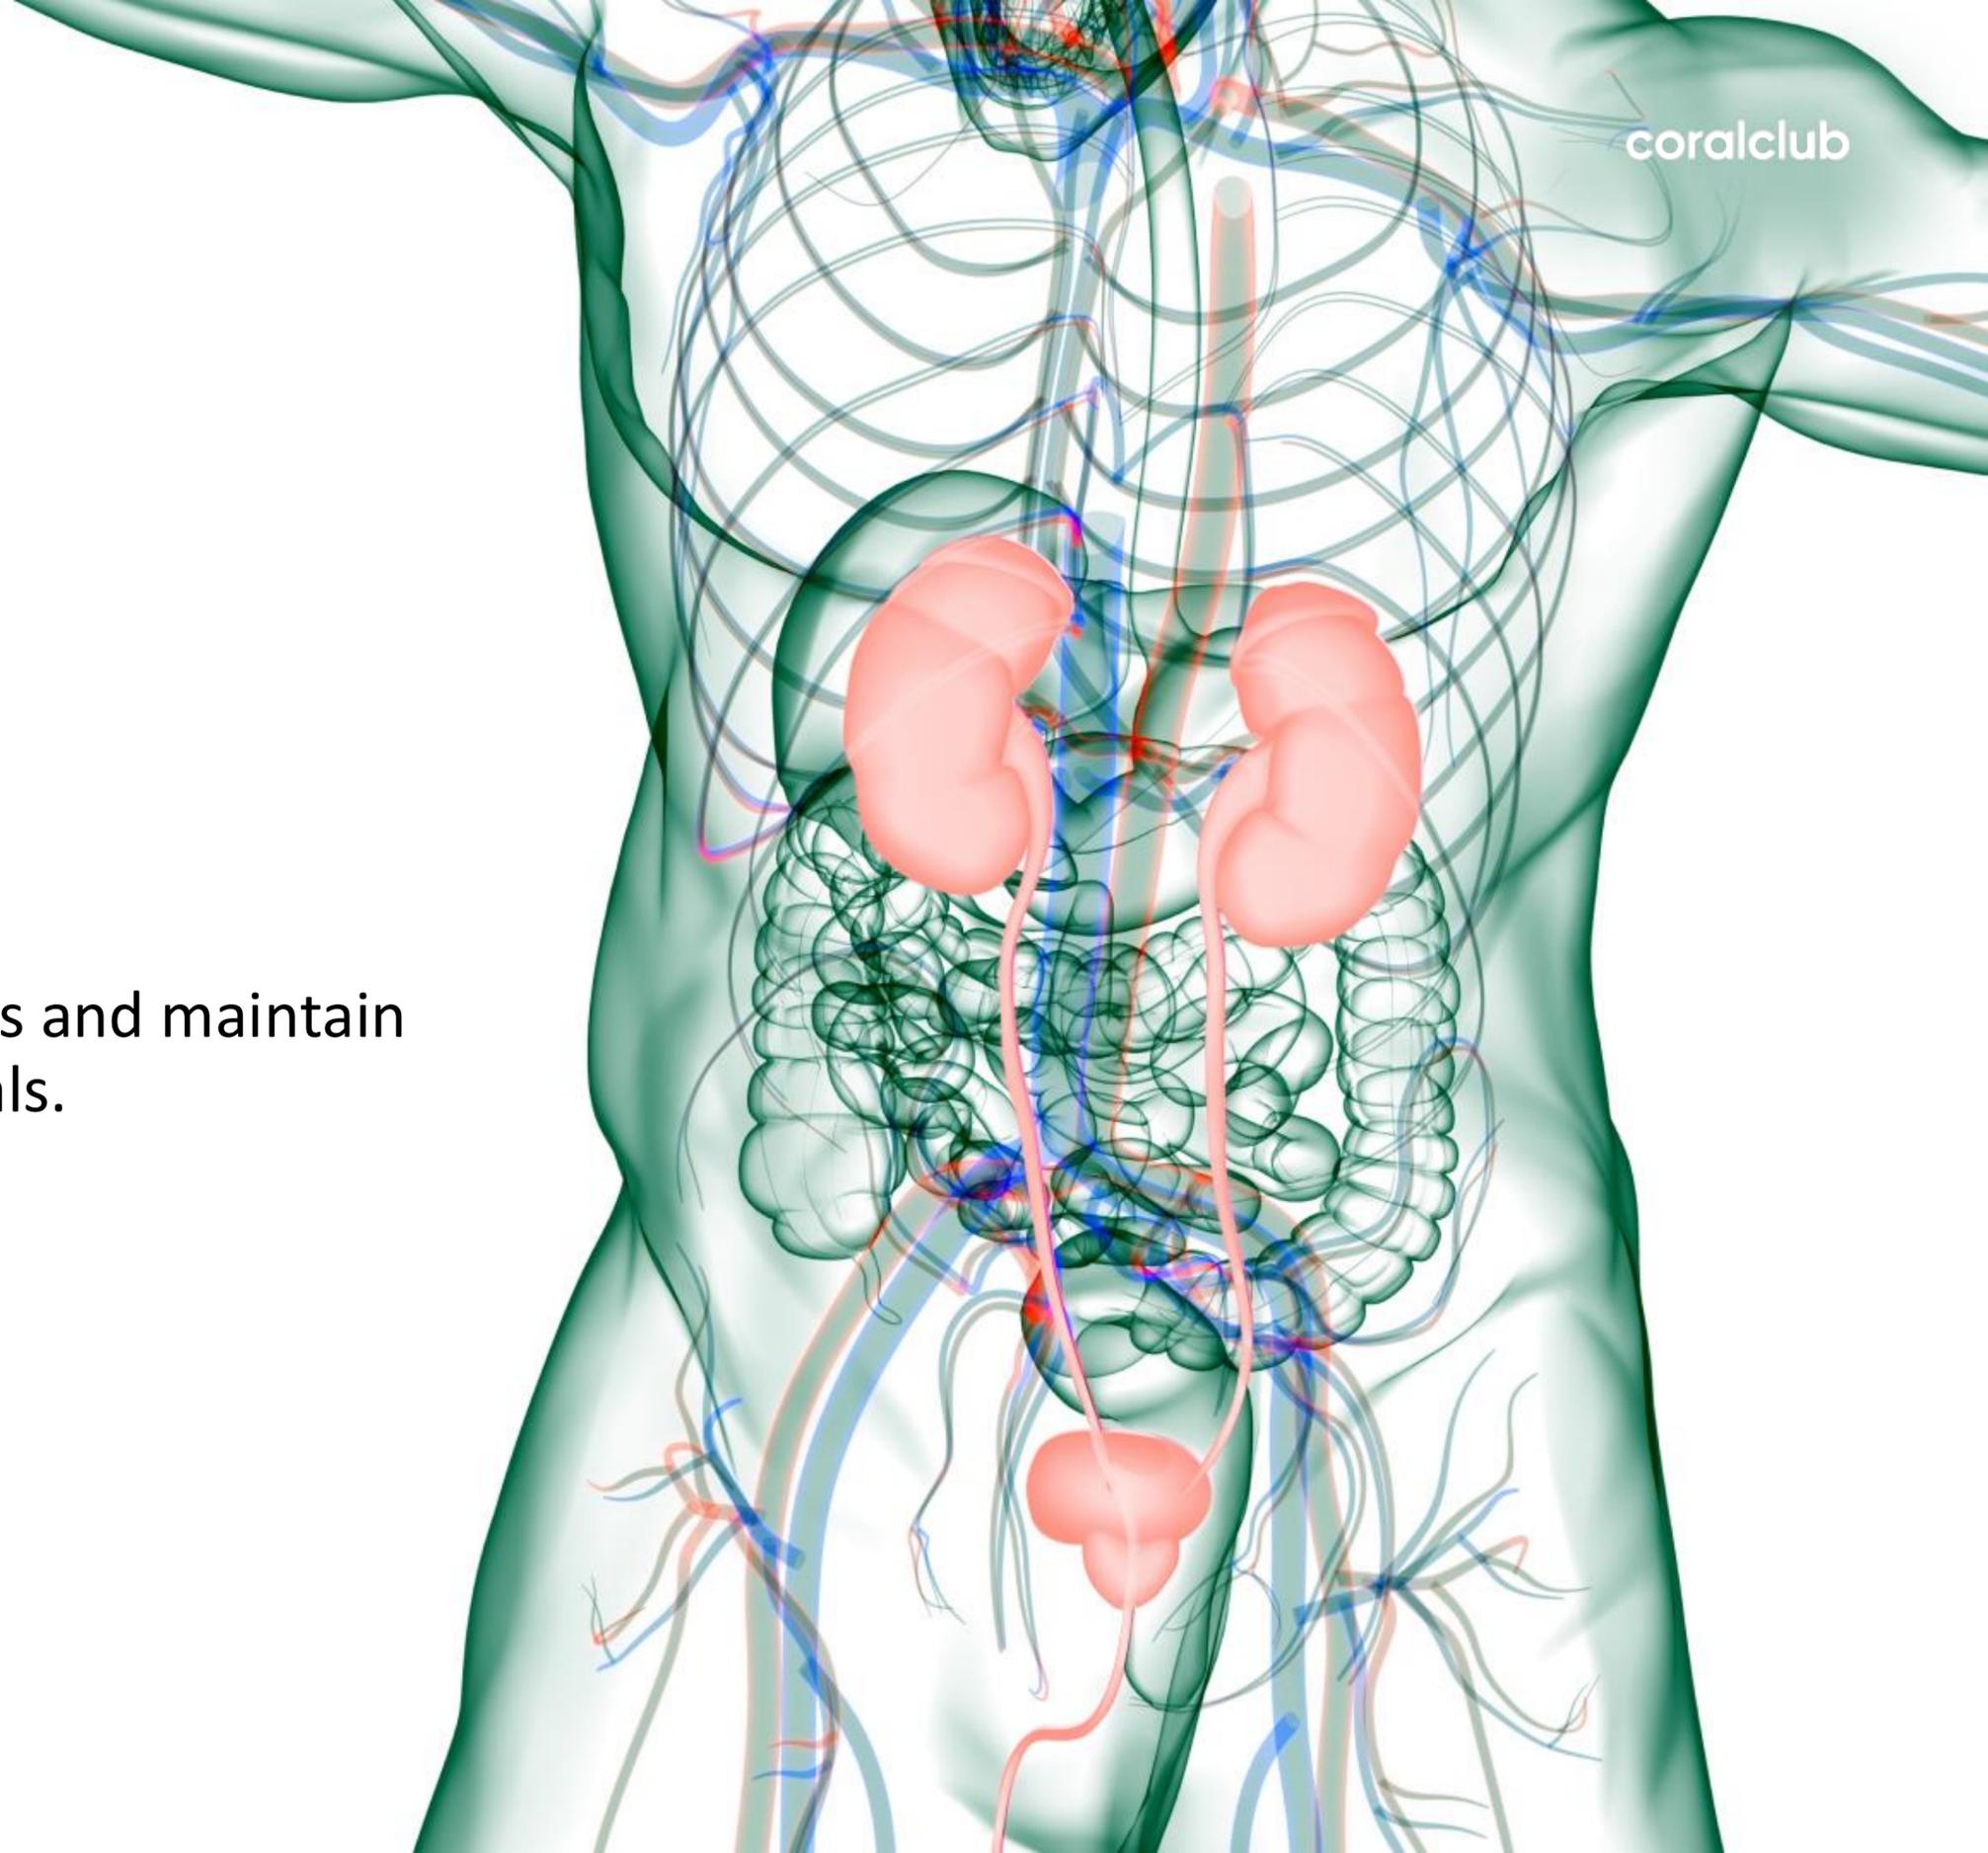

Supplement Facts
Serving Size: 1 Capsule
Servings Per Container: 60
Amount Per Serving
Vitamin B6 100mcg
Pyridoxine Hydrochloride
Cranberry 100mg
fruit extract (Dried)
Parsley 100mg
leaf extract
Juniper 100mg
berry extract
Horsetail 100mg
aerial parts extract
Nettle 100mg
leaf extract
Ginger 100mg
root extract
1 Daily Value

Urinary System

Our internal filter helps eliminate excess and maintain the body's balance of water and minerals.

The Kidneys are a Key Organ of the Urinary System

Filters

~ **120-150 liters**

of blood daily. This means the kidneys process the entire blood volume in the body about 20-25 times to produce 1-2 liters of urine.

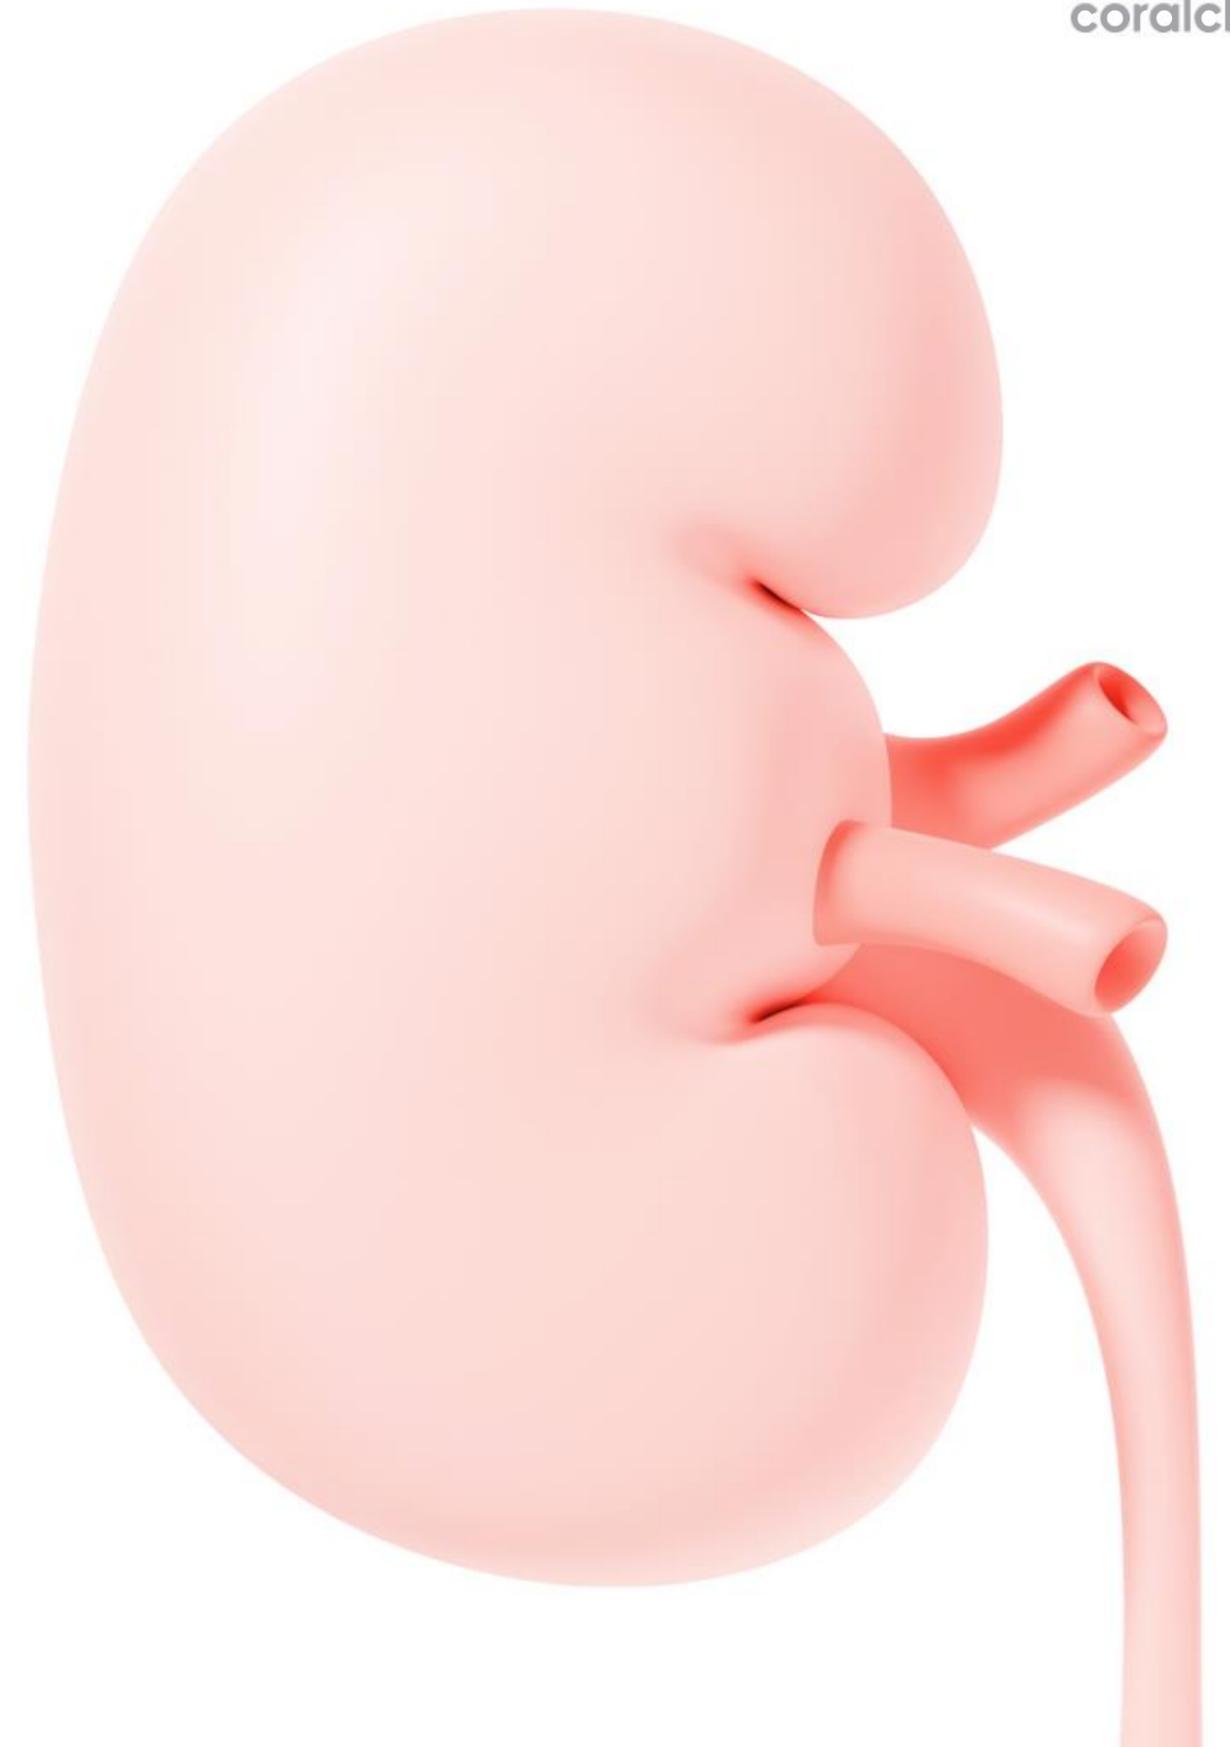

Consists of:

~ **1 million**

nephrons each. These are the basic structural and functional units of the kidneys.

They perform vital functions, including:

- Blood purification from toxins and metabolic waste;
- Maintaining water balance and the concentration of sodium, potassium, and calcium;
- Producing hormones for regulating blood pressure.

Maintaining Urinary and Kidney Health

The Urinary System plays a vital role in removing waste and maintaining the balance of fluids and minerals in the body.

Challenges to urinary and kidney health can impact overall well-being and daily life. The body may signal changes in urinary health through:

Fluid retention and swelling

Discomfort during urination

General fatigue or malaise

This information is for educational purposes only and is not intended to diagnose, treat, cure, or prevent any disease. If you experience changes in kidney or urinary health or have any health concerns, consult a healthcare provider for guidance.

~ **150** million people

experience symptoms of urinary tract infections annually [1].

~ **40%** of women

encounter urinary tract infections at least once in their lifetime [1].

These statistics highlight the prevalence of UTIs nationwide, emphasizing the importance of urinary tract health.

Tips for Supporting Urinary Health and Reducing the Risk of Urinary Infections

Thoroughly maintain hygiene

Do not hold urine; use the toilet at the first urge to do so

Drink your daily water need

Choose underwear made from quality materials and of the appropriate size for your body

Avoid getting cold: dress according to the weather and do not sit on cold surfaces

To support urinary health and provide additional care during times when your body needs it the most,

giving your body the right support can help maintain the healthy function of your urinary system.*

During periods of stress, phytocomplexes and vitamins can promote overall well-being and support the healthy function of the entire urinary system.*

Combination Flow is a comprehensive product to support kidney health*

*This statement has not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

The Key Component of Combination Flow is the patented Cranberry Extract Oximacro[®]

This large-fruited cranberry (*Vaccinium macrocarpon*), native to North America, produces vibrant red berries rich in bioactive compounds. For example, proanthocyanidins (PACs) are known to support urinary tract health and help protect the body from oxidative stress.*

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Cranberry Extract Oximacro[®] Is Rich in Unique Type A Flavonoids Known as Proanthocyanidins (PACs)

- **Supports the body's natural inflammatory response, promoting overall urinary tract health***
- Helps promote urinary tract health by maintaining a healthy internal environment and promoting healthy circulation by the kidneys.*
- Supports the health of blood vessels and promotes healthy circulation in the kidneys.*
- Functions as an antioxidant and provides support to help protect cells, including those in the kidneys, from oxidative stress and the effect of free radicals on kidney cells.*

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

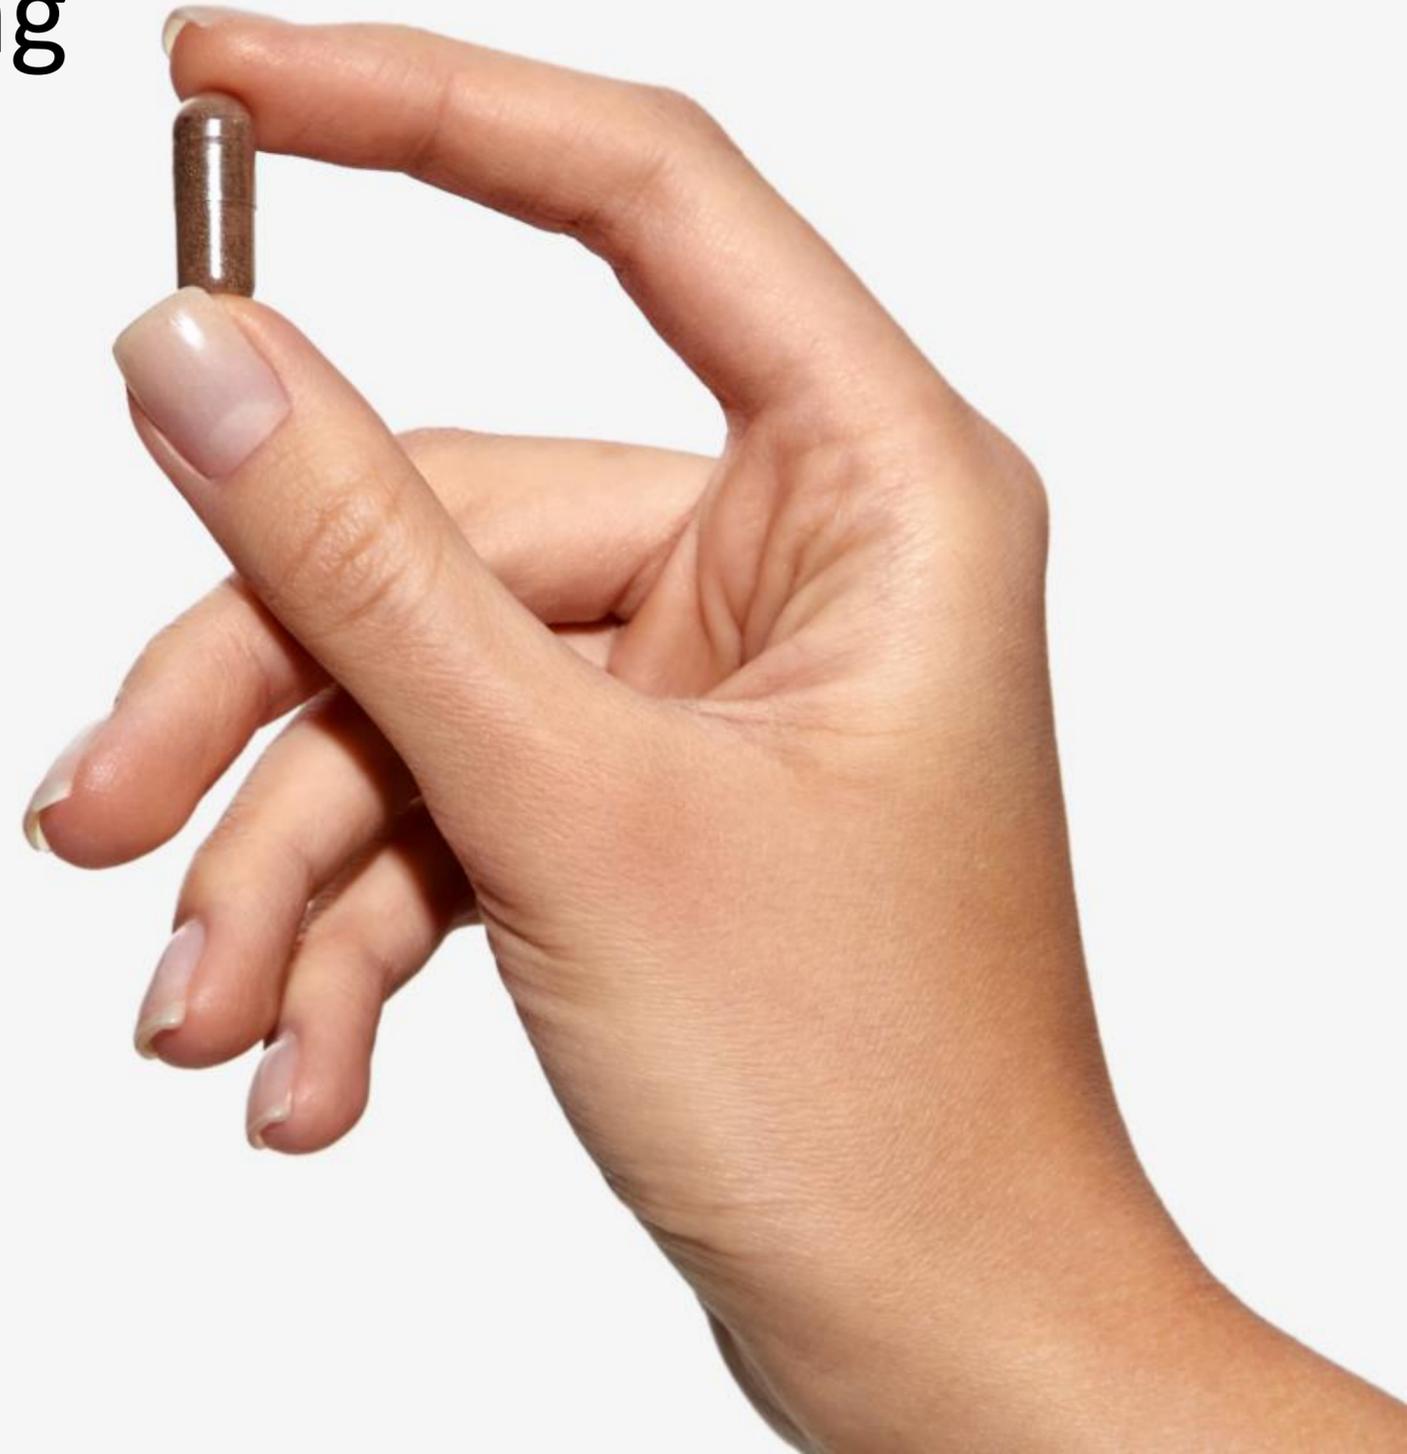

Research highlights the potential benefits of Oximacro[®] in supporting urinary tract health.

*Based on the results of a double-blind, placebo-controlled preclinical study. Oximacro[®] improved urinary health markers in individuals with a history of recurrent UTIs [2]

*The study evaluated a dose of 112 mg of Oximacro[®] containing 36 mg PACs-A, taken twice daily for 7 days [2]

PACs (proanthocyanidins) are natural compounds found in cranberries and other fruits. A-type PACs (PAC-A) have been extensively studied for their role in supporting urinary health, such as by reducing bacterial adhesion to the urinary tract lining.

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Synergy of Plant Extracts and Vitamin B6 for Kidney Health Support

Ginger

Ginger contains bioactive compounds with antimicrobial effects that support urinary tract health [7].*

Vitamin B6

Vitamin B6 supports water-salt balance, aids natural fluid regulation, and helps maintain kidney health by reducing oxalate levels, which may help minimize the risk of kidney stones in the urinary tract [8].

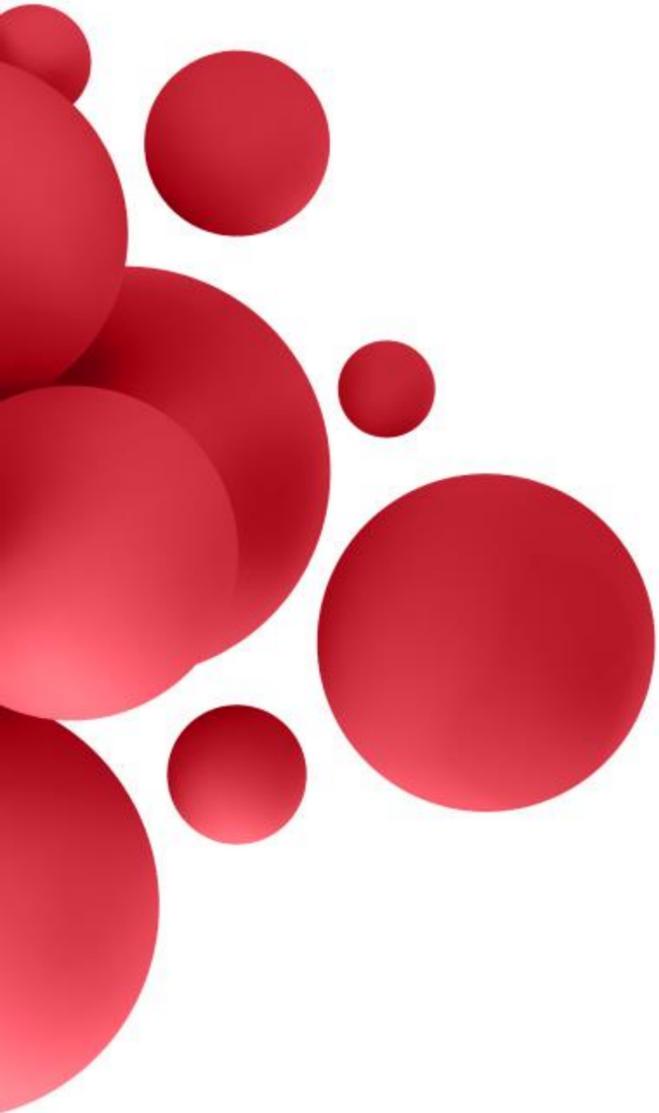

Juniper and Horsetail

Juniper and Horsetail provide antioxidants that help protect cells and support urinary tract health by promoting the body's natural defenses [5,6].*

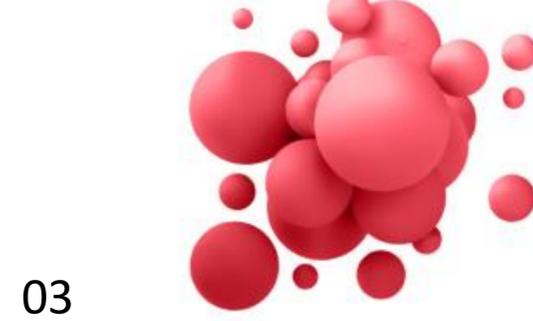

Nettle and Parsley Extracts

Nettle and Parsley Extracts support natural elimination processes, aiding fluid balance and maintaining urinary health by discouraging bacterial adhesion [3,4].

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Additional Benefits of the Components

01. **Ginger** — Contains gingerol with notable antioxidant properties, supporting overall health and helping protect cells from oxidative stress.*

02. **Nettle** — Contains bioactive compounds and nutrients that support the body's natural inflammatory response and immune system function.*

03. **Vitamin B6** — Plays a role in maintaining the nervous system and cognitive functions.*

04. **Parsley** — A natural ingredient traditionally used to support kidney health, promoting healthy fluid balance and aiding the body's natural detoxification pathways.*

05. **Cranberry** — Contains proanthocyanidins (PACs) with antioxidant properties, supporting urinary tract health, vascular health, and kidney function by supporting natural defenses and healthy blood and urine flow*

06. **Juniper** — Contains natural phytonutrients and antioxidants that support the body's defenses and promote overall health.*

07. **Horsetail** — A natural source of silica that supports collagen synthesis, healthy skin, bones, and urinary function as part of the body's natural detoxification process.*

Contents of 1 Capsule

Oximacro[®]
Cranberry Extract

240 mg

Parsley Leaf Extract

125 mg

Nettle Leaf Extract

25 mg

Horsetail Herb Extract

75 mg

Juniper Fruit Extract

50 mg

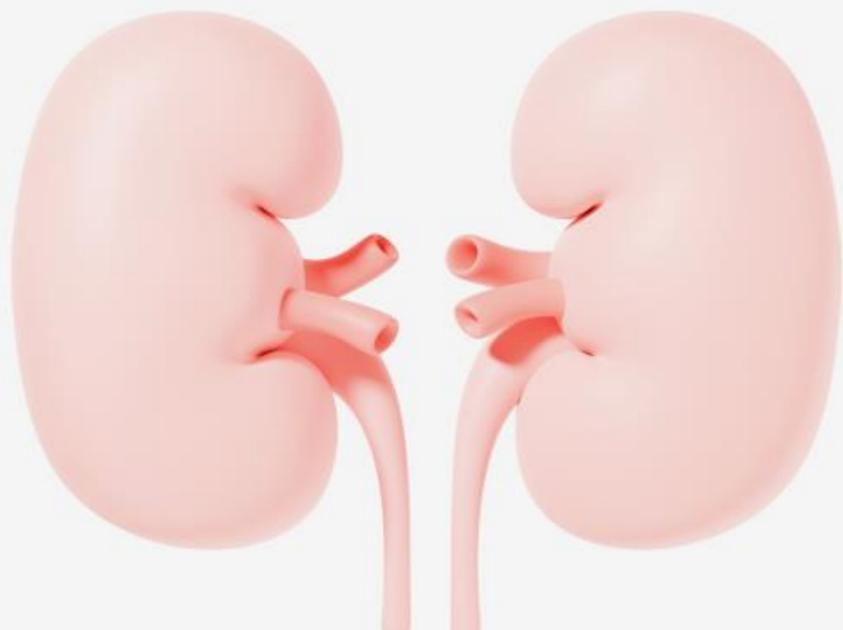

Ginger Root Extract

25 mg

Vitamin B6
(pyridoxine hydrochloride)

2 mg

Comprehensive Support
for Kidney Health*

Combination Flow

The Formula for a
Comfortable Life
